Depots in Fareham, Bristol, Newton Abbott, Maidenhead, Scotland

[WWW.southcoastpumping.co.uk](http://WWW.southcoastpumping.co.uk)

Thank you for placing your hire with us.

Just a quick reminder of the following that you need to provide us with so we can carry out your pumping requirements with minimum fuss and disruption.

Safe level area to set the pump up on.

Polythene or tarpaulin under the pump if on the highway or if environmental controls dictate.

Suitable barriers to isolate the public from pumping operation

Cement for priming the pump

Water supply and hose pipe to the pump if possible

Suitable wash out location we can reverse up to. If this is not possible then you must make a bund approximately 2 mx 2m out of scaffold board or similar to fit under the concrete receiving hopper.

For pm hires we aim to be on site at approximately 1 30pm, this time however cannot be guaranteed and you should liaise with shipping office for updates.

Concrete must not be dispatched to site until the pump has arrived and the operator has advised you to proceed.

Please feel free to ask any questions at any time. 01329 232220
